Manilpatel010@gmail.com | (905) – 516-6136 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

ECBA-certified Business Analyst with hands-on project experience in requirements gathering, SQL-driven data analysis, and Power BI dashboard development. Delivered process optimization solutions reducing processing time by ~30% and enabling ~70% automated decision logic. Proficient in Agile methodologies, BRD documentation, and end-to-end process mapping using industry-standard BA tools.

PROJECT EXPERIENCE

Retail Sales & Profitability Analysis, Canada Business Analysis Project (Retail Domain)

Apr 2026

- Diagnosed revenue leakage and margin decline by analyzing 10,000+ transactions, uncovering critical gaps in pricing and discount strategies
- Identified high-risk categories (e.g., Furniture) with strong sales but poor profitability, isolating sub-category losses driven by excessive discounting
- Performed structured root cause analysis to establish a clear relationship between discount levels and margin erosion, enabling data-backed business decisions
- Developed an executive dashboard to translate complex data into actionable insights for business users and decision-makers
- Recommended targeted pricing and product mix strategies to improve profitability and reduce margin loss

Loan Origination System Optimization, Canada End-to-End Business Analysis Simulation (FinTech)

Apr 2026

- Evaluated end-to-end loan origination workflows to identify bottlenecks, inefficiencies, and heavy reliance on manual processing
- Elicited and documented clear business and functional requirements (BRD, user stories, acceptance criteria) to support system and process improvements
- Redesigned future-state workflows by introducing rule-based decision logic (eligibility validation, document checks), improving efficiency (~30% based on workflow step reduction)
- Modeled current vs future state processes to align business requirements with system capabilities and support stakeholder understanding
- Defined and tracked key operational KPIs (processing time, approval rate, automation coverage), enabling structured performance monitoring and decision-making

Customer Churn Analysis, Canada Business Analysis Project (Customer Retention)

Mar 2026

- Investigated customer churn drivers by analyzing behavioral patterns, identifying key risk segments impacting retention
 - Quantified churn contributors, revealing inactive users accounted for ~40% of total churn based on usage segmentation
 - Translated analytical findings into business insights to inform targeted retention and engagement strategies
 - Defined KPIs and developed dashboards to monitor churn trends, customer segments, and business performance
 - Recommended data-driven retention initiatives with projected churn reduction of 15–20%, based on scenario and benchmark analysis
-

CERTIFICATIONS AND KEY SKILLS

Certifications: ECBA – IIBA (Feb 2026), Scrum Master Certified (SCRUM study), Microsoft Power BI, Excel for Business Analysts

Tools: Project Management Software (Notion, Jira, Confluence) • Data Analysis Tools (Tableau) • Microsoft Office Suite

Technical Skills: Database Management (SQL) • Data Analysis and Visualization (Power BI, Tableau, Ms visio, Draw. io)

Soft Skills: Communication • Stakeholder Requirement Elicitation • Gap Analysis • As-Is/To-Be Process Mapping • UAT Coordination

WORK EXPERIENCE

Johnson Electric, Ancaster, Canada Production Operator Associate

May 2021 – Present

- Conducted process gap analysis on daily production workflows, identifying inefficiencies that contributed to an estimated 10–15% reduction in setup time
 - Monitored and analyzed production data across 15+ machines using Excel, supporting KPI tracking and performance reporting for operational decision-making
 - Collaborated with cross-functional stakeholders (quality, maintenance, operations) to elicit operational requirements and address recurring production issues
 - Performed root cause analysis on process deviations and recommended data-driven solutions to improve workflow efficiency and reduce downtime
 - Supported continuous improvement initiatives by documenting process changes and tracking post-implementation performance metrics
-

EDUCATION

Fanshawe College, London, Canada Supply Chain And Operations Management

Sep 2019 – Apr 2021

Gujarat Technological University, Ahmedabad, India Bachelors Of Engineering

Aug 2014– May 2018
